Digital Thermo-Hygrometer
(Temperature & Humidity Measurement, Clock & Date Display)

Measure Temperature and Humidity. Display current time and date. Determine whether the environment is comfortable.

Functions

- Current time and date display
- Time alarm function
- 12/24 hours clock
- Degree C or Degree F temperature
- Relative humidity and relevant comfort degree
- Real time indications of temperature and humidity fluctuation

Specifications

- **Temperature range:** -50 degree C ~ 70 degree C
- **Temperature Resolution:** 0.1 degree C
- **Temperature Precision:** +/- 1.0 degree C
- **Humidity reading range:** 20-90%RH
- **Humidity Resolution:** 1%
- **Sampling Rate:** Once every 10 seconds
